

## Technician • Rome

### Position

Technician

### Job Institution – Department

IRCCS San Raffaele Roma, Synaptic Immunopathology Lab.,  
Via di Val Cannuta 247, 00166 Rome

### Deadline

30<sup>th</sup> April 2023

### Scientific Responsible

Prof. Georgia Mandolesi

**Job Description:** We are seeking a talented and motivated technician to participate in a project that intend to study the role of catecholamines in the interplay between the immune and nervous systems in the context of Multiple Sclerosis.

The project has been founded by PNRR-M6/C2-2022

The successful candidate will have a degree in biomedical laboratory technician or related disciplines and preferably have 1-2 year laboratory training in molecular and cellular biology.

As technician the candidate will be involved in:

- analysis of biological samples by means of molecular biology (qPCR) and biochemistry (Western blot, Luminex) techniques;
- isolation of immune cells from biological samples and cell culture;
- animal handling;

The role is based in Rome – Italy.

Salary will be commensurate with experience. The successful candidate will work with a flexible working schedule.

To submit your application, please send a CV and motivation letter and the name and contact details of potential referees to Georgia Mandolesi – [georgia.mandolesi@uniroma5.it](mailto:georgia.mandolesi@uniroma5.it)
