

Curriculum Vitae

Tedesco, Barbara

Researcher unique identifiers

ORCID: [0000-0002-7077-3696](https://orcid.org/0000-0002-7077-3696), WOS Research ID: ACU-5360-2022, Scopus ID: 57093952000

Current position

Assistant Professor in Experimental Biology

Dept. Pharmacological and Biomolecular Sciences (DiSFeB), Università degli Studi di Milano,

Via Balzaretti 9, 20133 Milan, Phone: +39 0250318227; E-mail: barbara.tedesco@unimi.it

Education

23/02/2021: PhD in Integrative Biomedical Research, Università degli Studi di Milano

16/03/2017: MSc Pharmaceutical Biotechnology (110/110 cum laude), Università degli Studi di Milano

14/12/2014: BSc Pharmaceutical Biotechnology (110/110 cum laude), Università degli Studi di Milano

Professional Appointments/ Previous Positions

Dec 2022 - Jan 2023: Post-doctoral fellow at DiSFeB, IRCCS Istituto Neurologico Carlo Besta, Milan

Dec 2021 - Nov 2022: Post-doctoral fellow at DiSFeB, IRCCS Istituto Neurologico Carlo Besta, Milan

Dec 2020 - Nov 2021: Post-doctoral fellow at DiSFeB, IRCCS Istituto Neurologico Carlo Besta, Milan

Apr 2019 - July 2029: Visiting PhD student at the research group "IPS Cells and Neurodegenerative Disease" (Prof. Jared Sterneckert), Technische Universität Dresden (Dresden, Germany)

Oct 2017 – Nov 2020 PhD student in Integrated Biomedical Research, Università degli Studi di Milano, Milan

Apr 2017 - Sep 2017: pre-doctoral Fellow, DiSFeB, Università degli Studi di Milano

Awards and Honors:

2023: "Guido Tarone" Award for young researcher under 35 – XXI National Congress A.I.B.G.

2019: Neuroinflammation Award 2019, 18th National Congress of the Italian Society for Neuroscience (SINS)

2017: Reward for an Experimental Thesis on Amyotrophic Lateral Sclerosis, "Io Corro con Giovanni"

Publications (total number, citation index, 5 selected):

Publications: 31 (7 as first/co-first; 1 as co-last); H-index: 15 (Scopus, Sep 25); Citations: 995 (Scopus, Sep 25)

*Co-first authors

Research Interests and major collaborations:

My research focuses on cellular and molecular mechanisms involved in neuromuscular diseases (ALS, SBMA, hereditary spastic paraparesis, CMT/dHMN, and myopathies). I study intracellular system alterations, particularly the role and dysfunction of protein quality control (PQC) and ribosome quality control (RQC) pathways—such as chaperone systems, proteasome, and autophagy—and the effects of proteotoxicity caused by protein misfolding and aggregation, and how these pathways can be modulated to counteract the diseases.

Major ongoing collaborations: Prof. Vincent Timmerman (University of Antwerp), Prof. Virginia Kimonis (University of California-Irvine), Prof. Carlo Rinaldi (University of Oxford).
